**THE CITY OF OHRID**

In the heart of the Balkans, at the northern side of the Lake, between the walls of Czar Samuel's fortress, the old part of the city jealously preserves the secrets of many civilizations—the antique theater, the early Christian basilicas, numerous churches built between the 9th and the 14th century, hundreds of square meters fresco paintings, a rich gallery of icons, manuscripts and other rarities. It is said that there used to be 365 churches in Ohrid—one for each day of the year. The fact that Ohrid had been an object of desire for many kings, archbishops, speaks for itself, challenging the curious ones to visit it to nowadays. The beautiful architecture of the 19th century in the old part of the city, with its narrow streets creates a sense of unique harmony and beauty. Its beauty and virtuosity attracts the attention not only of tourists, but of many experts as well. One special cultural monument of Ohrid is the Old Bazaar—old shops rich with a variety of crafts products—filigrees, pearl, copper, pipes...

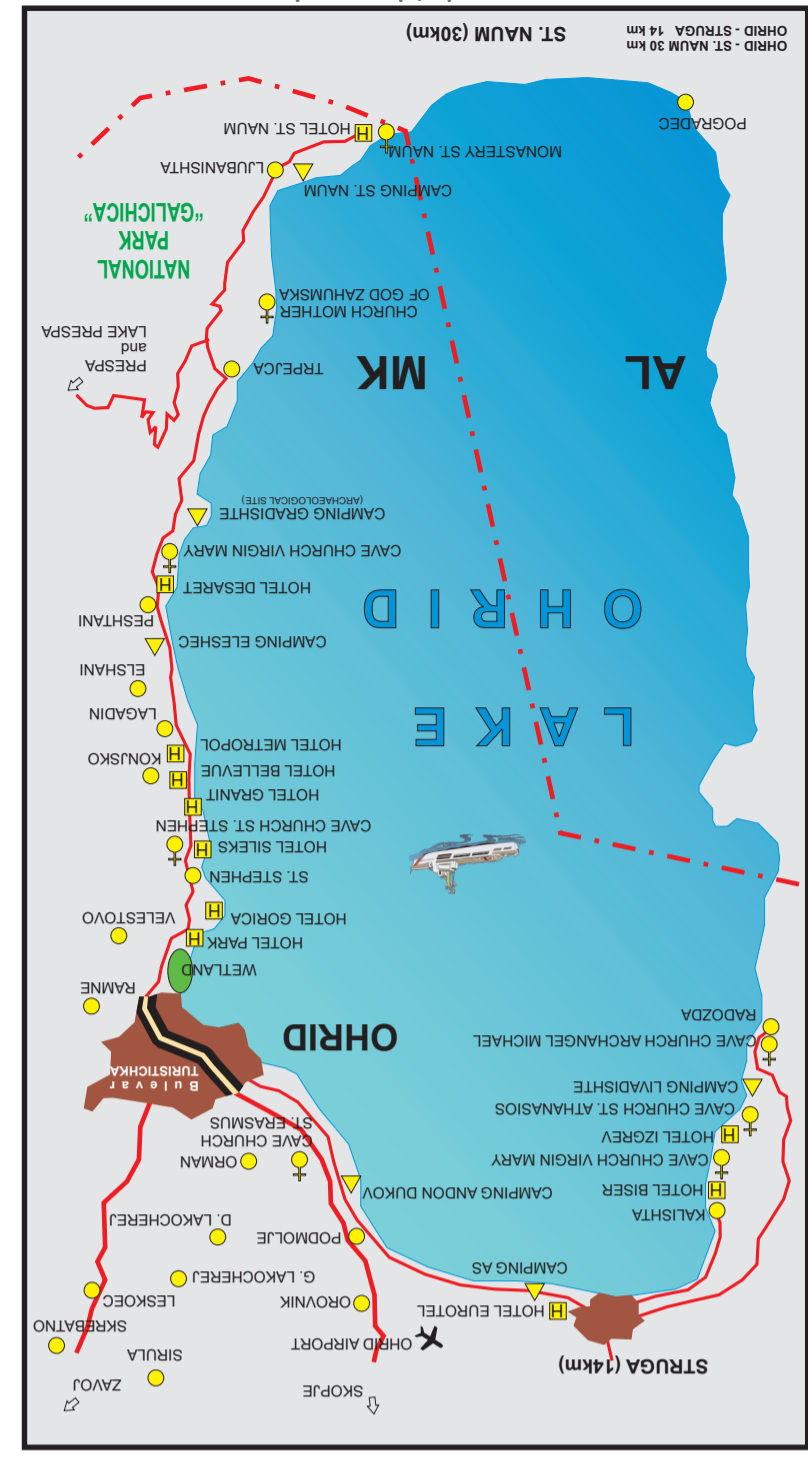

The artistic activity in Ohrid is included in the highest achievements of European art in this period. The city and Ohrid Lake, have both, since 1980, been under the protectorate of UNESCO, as having universal cultural, historical and natural values and significance.

The new modern part of the city which, both with the old part, creates a synthesis between the past and the future, is located on the plain near to the lake's shore. The city of centennial tradition is at the same time a city of modern living. Tourists from all around the world visit it because the moments spent in Ohrid are always transformed into most impressive segment of the short human lifetime.
